

80/20 3 rail bed

The ideal bed for children

The **Bock 80/20 3 rail** lie-low bed is the first electrically adjustable nursing bed that fulfils all standard specifications for adjustability, with a range from 20cm to 80cm and it has 3 rails with an 11cm gap .

The **80/20 3 rail bed** is easy to integrate in different living environments and creates a comfortable, homely atmosphere whilst providing protection for the individual and carer.

Available with
bumpers

Optional
tumblemat

Key Features:

- Only paediatric low bed to meet EN60601-2-52
- Unrivalled height adjustment range
- 4-section profiling
- Attractive appearance
- **3 rails with 6cm gap**

Domiflex 80/20

In addition to its complete ground clearance and mobility at any height, the lifting range makes the Domiflex **80/20** unique, allowing a low bed for safety and height adjustment for the correct nursing level.

The electrical height, back and leg section adjustments with automatic 3-setting function enables all lying positions.

Various options and accessories can be ordered for the head and foot boards and siderails including the vizio see through panel bumpers.
